Summary

Full Stack Developer with 6+ years of experience and a Frontend specialization (React, Next.js, TypeScript). I have contributed to the development of products for banking (Bancolombia's Tu360 portals on VTEX), music distribution (Naeku) and payments (Fygaro), and built sites and applications for clients of my own studio, Weeeb, with backends in Node.js and Python on AWS, Google Cloud and Firebase. Creator of Delimenú, a SaaS for restaurants with Stripe payments, AI-powered menu import and an MCP server. I currently work with AI-assisted development tools (Cursor, Claude, Codex) to speed up implementation and code review.

Experience

Software Engineer · Archie Labs [↗](#) · Miami, USA (remote)

April 2025 – Present

- Full stack development of web applications for clients across industries (architecture, equine management, truck fleet monitoring and medical license administration), working on the frontend with React and Tailwind CSS and on the backend with Node.js and AWS.

React Node.js Tailwind CSS AWS Cursor Claude Stripe Docker GraphQL

Frontend Developer · YT Rocket [↗](#) · Medellín, Colombia (remote)

October 2024 – March 2025

- Frontend development of [Naeku](#) [↗](#), a music and video distribution platform that lets independent artists and labels publish their catalog, reach a global audience and monetize their content.
- Built complete modules of the artist app: the home with an actions panel and learning path, the new release flow (single, EP and album) and the profile page with validated forms, from Figma designs and consuming the platform API.

Next.js React TypeScript Tailwind CSS MongoDB Python Docker GitHub Copilot

Full Stack Developer · Fygaro [↗](#) · Panama (remote)

July 2024 – October 2024

- Built components for [Fygaro](#) [↗](#)'s payments platform (payment links, online store and invoice collection for merchants) and handled ongoing maintenance and bug fixing on the frontend (React) and the backend (Python).

React JavaScript Python MySQL GitHub Copilot

Frontend Developer · ITGlobers [↗](#) · Bogotá, Colombia (remote)

April 2022 – June 2024

- As a vendor for Grupo Bancolombia, built components and sections of the public portals, built on VTEX, [Tu360 Inmobiliario](#) [↗](#) (real estate search and listings) and [Tu360 Movilidad](#) [↗](#) (vehicle search and financing), including the home page sliders and the product cards used across every listing page.
- Built internal modules of Tu360 Inmobiliario's [platform for real estate developers](#) [↗](#) and handled ongoing maintenance and bug fixing across the three platforms.
- Implemented responsive interfaces from Figma designs, API integrations and unit tests with Jest, following the accessibility and security standards of a banking client.

Founder & Full Stack Developer · Weeeb [↗](#) · Delaware, USA

April 2021 – Present

- Founded [Weeeb](#) [↗](#), a web development studio through which I have built sites and applications for clients across different industries, mainly real estate (hotels in Medellín, construction companies and real estate events), covering design, development, deployment and maintenance.
- Created and maintain [Delimenú](#) [↗](#), a SaaS for digitizing restaurant menus: admin panel, public menu with QR code, subscription billing with Stripe, AI-powered menu import (Vercel AI SDK) and an MCP server to manage the menu from agents. Next.js, Firebase (Firestore and Cloud Functions) and Vercel. It is the project where I have grown the most technically.

Frontend Developer · Waco Services [↗](#) · Cali, Colombia (hybrid)

July 2020 – March 2021

- Started from scratch the development of [Nomad OS](#) [↗](#), a web application with sales and learning tools for digital nomads, defining the frontend structure and its first modules.

React JavaScript SASS Firebase

Application Developer · Universidad Santiago de Cali [↗](#) · Cali, Colombia

February 2020 – December 2020

- Started the development of a mobile app with React Native and Expo to display and geolocate the Republican-era architecture landmarks of Cali.

React Native Expo JavaScript

Open source projects

crd-ui [↗](#) · [crd-ui.juanda.co](#)

- Credit/debit card component library for React, Vue, Svelte and vanilla JavaScript, with theming and localization support.

TypeScript React Vue Svelte npm

Education

Claude Code in Action [↗](#) · Course with completion badge · Claude Academy (Anthropic)

July 2026

Systems Engineering · Universidad Santiago de Cali [↗](#) · Partial studies

2020 – 2021

Associate Degree in Systems Technology · Universidad Santiago de Cali [↗](#)

2017 – 2020

Frontend Developer Program · Platzi / Facebook Developer Circles [↗](#) · Plus

November 2019 – April 2020

170+ certified courses on Platzi [↗](#) (web development, backend, testing and security)
